

## Webinar Events *live & interactive*

# Excel: Focus on IF Formulas

**Level:** Intermediate

**Presented by:** Serena McCusker

**Delivered as:** A live and Interactive 90 minute webinar

This practical workshop is packed with useful example of how to use the IF formula in Excel. This versatile formula is used to analyse data: you can evaluate text, values and even errors then return one value for a TRUE result and another for a FALSE result. You can even change the colour of text or display symbols.

### You will learn:

- Simple IF and Nested IFS
- IFERROR
- OR and AND
- IFS and SWITCH
- Conditional Formatting Formula

### What next?...

- Excel: Focus on VLOOKUP Formulas
- Excel: Focus on Advanced Lookup Formulas
- Excel: Focus on Text Formulas
- Excel: Focus on Date Formulas
- Excel: Focus on Troubleshooting Formulas
